Projects

CodeArena – Online Code Judge (MERN) GitHub

- Developed a MERN-stack coding platform where users can solve programming problems and submit solutions in multiple languages.
- Implemented JWT-based authentication and MongoDB models for users, problems, and submissions.
- Integrated Judge0 API for secure code execution and automated evaluation of code submissions.
- Built submission history tracking and leaderboard functionality for performance monitoring.

Hand Gesture Controlled Hill Climb Racing GitHub

- Developed a gesture-controlled gaming interface using Python, OpenCV, and MediaPipe.
- Implemented real-time hand landmark detection to capture finger movements.
- Mapped hand gestures to keyboard controls using PyAutoGUI for touch-free gameplay.
- Achieved smooth and low-latency interaction for an enhanced gaming experience.

Social Network Analyzer GitHub

- Designed a graph-based social network simulation using C++ and adjacency list representation.
- Implemented BFS and DFS algorithms to analyze relationships and user connectivity.
- Developed friend recommendation and shortest connection path features.
- Applied graph analytics techniques to model and explore social network structures.
